Education

University of Maryland Global Campus: Bachelor of Science in Computer Science - Expected May 2027

Relevant Coursework: Discrete Structures, Software Development, Advanced Programming, Compiler Theory, Machine Learning, Calculus III, Linear Algebra, Differential Equations, Algebraic Structures, Real Analysis, Complex Analysis

University of Colorado Boulder: General Education Coursework, Transferred - August 2022 to May 2023

Relevant Coursework: Astronomy, Ethics, Philosophy, General Education Credits

Certifications

NASA Open Science Essentials: Open Source Ethics, Open Results, Licensing - August 2026

NASA Open Science 101: OSF, Source Control, Open Data, Documentation, Development - August 2026

NASA ARSET Fundamentals of Remote Sensing: GIS, Satellite Sensors, Orbit Characteristics - August 2026

Skills

Languages: C, C++, Rust, Python, Java, JavaScript, TypeScript, Swift, SQL, HTML, CSS

Frameworks: React.js, Node.js, SwiftUI, SwiftData, NumPy, Tesseract, Matplotlib, TensorFlow, PyTorch, Pandas

Technical: CUDA, Vulkan, MLX, Git, Flex, Make, AWS, Embedded C, Microcontrollers, Linux

Projects

GoDash iOS app: <https://godash.us/>, Swift, SwiftUI, SwiftData, AVFoundation, Core Motion, macOS, iOS

An iOS dash cam app that lets users use maps and music while also recording with the iPhone camera.

- On the App Store. Records looping dashboard video through the windshield using a hands-free phone mount.
- Recording loop time up to 10 minutes. Other features include crash/hard brake detection and telemetry overlays.
- Interface employs distraction-free multitasking using half-screen modules for Apple Maps and Apple Music.

Crucible: <https://github.com/mattsaunder/crucible/>, C, C++, Python, JavaScript, CUDA, Vulkan, MLX, Llama

A local LLM toolkit for model fine-tuning, mixture of agent delegation, and iterative self-refinement.

- Users supply or create custom fine-tuned models for specific subjects such as mathematics, physics, and humanities.
- When a user sends a prompt, the delegator model decides which expert model loads, computes, and outputs.
- Models can work on the prompt repeatedly, improving each pass. Full support for CUDA, Vulkan, and MLX runtimes.

Tiny: <https://github.com/mattsaunder/tiny>, Rust

An extremely lightweight, terminal-based personal knowledge management system, IDE, and text editor. Written in Rust.

- Max installation size of 7.54MB. Supports editing plain text, Markdown files, and 212 programming languages.
- Full configuration for color, window size, key bindings, and syntax highlighting. Works in any terminal.
- The project map feature displays project contents connected with arrows showing file links like function calls.

Cosmos.js: <https://github.com/mattsaunder/cosmos.js>, JavaScript, HTML/CSS, Python

An ASCII art generator that generates animated ASCII planets and exports Python and JavaScript for any project.

- Fully hosted on a static site with zero plugins or frameworks. Can be hosted locally. Runs in any browser.
- Uses a ray-cast model to dictate the lighting and shading using a Bourke character ramp. Texturing is random.
- The program exports its own code it's using for the planet preview that can be copied and pasted to any project.

Work Experience

Micro Center: System Sales Associate, Parkville, Maryland, November 2024 to April 2025

- Managed full solution tech sales including hardware, software, and warranties to individuals and business clients.
- Performed requirements analysis for each client to fit within the system specifications and budget constraints.

BMW Group: Client Advisor and Lease Manager, Towson, Maryland, January 2023 to May 2024

- Surpassed monthly goal of 12 deals. Maintained a client book of over 100 clients.
- Promoted to lease manager and increased recurring customer lease numbers by over 60% using equity mining tools.

Best Buy: Sales Associate, White Marsh, Maryland - Boulder, Colorado, November 2020 to May 2022

- Excelled in selling Best Buy Total Tech on phones, computers, printers, and TVs by building rapport with customers.
- Communicated with outside companies for telecommunication service contracts and warranty repair orders.
